

# Graduation ceremony on September 28, 2024

## What a farewell!

On September 28, 2024, the second graduation ceremony took place at the Faculty of Biology. Around 80 students were celebrated for their graduation.

First, there was a champagne reception in the foyer of the Biology Tower, followed by a ceremony. At this ceremony, Dean Prof. Sonja-Verena Albers told the graduates and their guests some exciting information about the faculty.

Afterwards, Vice Dean Prof. Thomas Ott gave a lecture in which he also picked up on study content from the first semester of the Bachelor's degree - the graduates were able to refresh their knowledge and the guests were able to learn something new. The graduates were then officially bid farewell. All of them were called up one by one by Dean of Studies Prof. Annette Neubüser - it was certainly a highlight to stand at the front of the lecture hall, which was otherwise only known from morning lectures and evening film screenings of the aka film club, and to receive a big round of applause for the achievement of graduation!

After the ceremony, the guests were able to explore the content of a biology degree with various mini experiments. Drinks and food were provided by the Biology Student Council, who organized the event together with the faculty.

We congratulate all graduates and wish you all the best for your future!
