

site plan for severely disabled representatives

The office of the representative for the severely disabled is located in the mathematics department at Ernst-Zermelo-Straße 1 on the 1st floor.

When you enter the building through the barrier-free side entrance, you will find a bell on the right with a sign for the representative for the severely disabled. A ride chair is available there if you need it. Otherwise you will find the office on the 1st floor directly to the right after the staircase.

If you enter the building through the main entrance (only with the unicard), go to the first floor, then turn right and then just go straight ahead until you find the door of the representative office for the severely disabled.
