

Guidance about classroom instruction requiring “3G” proof (tested, recovered, vaccinated) at the University of Freiburg

You will find important information about events for which the Hygiene Regulations at the University of Freiburg or the CoronaVO study operations require the presentation and verification of a test, vaccination or recovery certificate.

What can be submitted for 3G proof?

Proof can be submitted as an electronic document or in paper form.

The [Corona-Warn app](#) or the [CovPass app](#), for example, can be used for this purpose. The EU digital COVID certificate can be obtained after vaccination, recovery or a negative test result at the vaccination center or doctor's office.

The printout of the EU COVID certificate can also be presented.

In addition, proof of full vaccination is also possible by presenting a valid vaccination certificate ("yellow vaccination certificate").

If a test result is presented as proof, it must be up-to-date, i.e. the underlying test may not be older than 24 hours. In the case of a certificate of recovery, the validity period (not older than six months) must be observed. Proof can be submitted as an electronic document or in paper form.

Is a documentation about 3G proof permissible?

No, any type of documentation of proof is not legally permissible at this time.

Who must provide 3G proof?

The test, vaccination or recovery certificate must be presented by all persons participating in the event. The management of the event must document the existence of a test, vaccination or recovery certificate for itself in a statement.

When 3G proof have to be provided?

3G proof must be provided for every single meeting.

Does one have to provide identification along with it?

In principle, no. It is a formal check whether the information contained in the 3G proof is correct. In this respect, a plausibility check is required (e.g. comparison with the list of participants), but a personal check via an ID card or the like is not mandatory.

What happens if 3G proof is required but cannot be shown?

Participation is only possible upon presentation of proof of testing, vaccination or recovery. Persons without 3G proof are therefore not allowed to participate in such an event.

Anyone who participates in an event contrary to this requirement is acting in breach of regulations as defined in Section 73 (1a) No. 24 of the Infection Protection Act.
